

Washington Wilderness Principals

The common ground that local Wilderness and mountain bike advocates in Washington State have identified is summarized by the following shared goals.

1. Support permanent protection for high value wild lands and waters in Washington State (i.e., Wilderness and Wild and Scenic River designation)
2. Seek to avoid the loss of existing priority mountain bike trails and future trail opportunities as a result of new Wilderness designations.
3. Support some level of protective management for lands underlying or surrounding priority mountain bike trails excluded from Wilderness designation.
